INDUSTRIAL MINERALS PRODUCER WAREHOUSE ASSET AUDIT

Case Study: Fixed Asset – Producer of Industrial Minerals

One of the world's largest and most experienced producer of ground calcium carbonates (GCC) required the support of RGIS. The company operates three limestone quarries and four mineral processing plants producing within Australia.

REQUIREMENT

The industrial mineral producer needed an inventory of all **spare parts and assets across multiple sites**, so required RGIS to provide the following:

- Complete a **count of all spare parts** at each of the two sites
- Complete a **count of all assets** including **asset verification** at each of the two sites
- **Identify items** that could not be counted or identified

SOLUTION

The industrial mineral producer partnered with RGIS to complete the **spare parts and asset count project**, and RGIS provided the following:

- **RGIS developed new software** in order to capture all the relevant data including imagery requested by the customer
- **Experienced RGIS teams counted all spare parts and assets** in the locations, and followed the scanning procedure, capturing all the required data and taking photographs
- RGIS teams identified assets that were inconsistent with reporting, which were logged and resolved by the customer

RESULTS

The industrial mineral producer found by outsourcing the **spare parts and asset count project** to RGIS, the following results were achieved:

- Teams accurately counted **1,346 assets** across two sites
- Results were provided in two parts; in **Microsoft Excel and photographs**
- The customer received an **updated and accurate asset register**
- The customer was **very happy with the RGIS teams** and will be working with RGIS again in the future

By partnering with RGIS, the industrial mineral producer had **all spare parts and assets accurately counted, photographed and updated on the asset register**
